BIPHASIC PEELING

SUPERNOVA

Scientific research serving aesthetic medicine

With Supernova scientific progress is completely at the service of personal well-being. With a courageous vision and ever more stimulating objectives, we are projected to become the world's reference point on the patented medical device market for aesthetic medicine.

SUPERNOVA

NEXT GENERATION MEDICAL PEELING

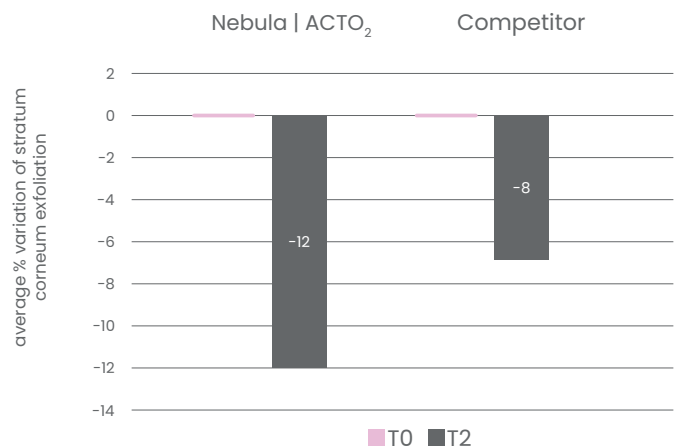

Dryness

Dryness is a factor that is directly proportional to the keratolytic action of a product. An increase in the dryness therefore indicates a greater exfoliation of the horny layer. Nebula | ACTO₂ has proven to increase skin dryness by 10% compared to other products with a higher acid content in the formula.

Keratolytic effect

Tests with competitor products highlight the greater exfoliating power of Nebula | ACTO₂ when compared to products that have a higher concentration of acids. The diagram shows how the horny layer removed after treatment is up to 12% thinner.

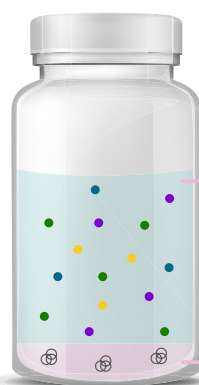

SUPERNOVA

LABORATORIES

The new era of cell regeneration and biorevitalization without needles, for all skin types and all areas of the face and body. A full line composed of the innovative PATENT PENDING **Nebula | ACTO₂**, **Nebula | ACTO₂ ORION** biphasic peelings and the post-treatment cream **RH VIRGO**.

Nebula | ACTO₂ and **Nebula | ACTO₂ ORION** contain trichloroacetic acid enriched with an innovative and functional blend of mandelic acid, vitamin B12, azelaic acid derivative and perfluorocarbons. The synergistic action of the two phases (acidic and oxygenating) **determines an instant cell renewal and a significant regeneration of the dermoepidermal layer.**

● TCA: (10% or 14%)

● Azelaic Acid

● Mandelic Acid

● Vitamin B12

⊗ Perfluorocarbon

CHARACTERISTICS

- Chemically stable
- Greater exfoliating power and strong stimulation of cell turnover
- Good tolerability
- Stimulation of collagen production

Nebula | ACTQ₂ Biphasic Peel

Skin target: sensitive, thin, dry, young
Benefits: Soft Wrinkle Reduction | Brightening & Lightening | Acute Acne Relief | Biorivitalization

Nebula | ACTQ₂ ORION Strong Biphasic Peel

Skin target: combination, oily, thick, mature
Benefits: Clear Comedonal Acne | Reduce Deep Wrinkles & Scars | Fade Spots & Hyperpigmentation | Intense Biorivitalization & Glow

RH VIRGO

RH VIRGO is an emulsion specifically designed to be used after peeling treatment with Nebula | ACTQ₂ and is to be used on the treated areas.

The formula contains:
 Perfluorodecalin | Plankton extract | Avocado oil | Karité butter | Vitamin E | Sunscreens

The new era of
**cell regeneration
& biorevitalization**
without needles
